EHS Audits

A verification that procedures
and practices are in
compliance with legal
requirements and internal
policies

Challenge

Valued Quality. Delivered.

You want to minimize the risk of failure of your internal and external supply chain and reduce the risk of reputational issues.

It is important for you to apply uniform global EHS and social standards and policies for your own sites and your suppliers.

We can:

- Ensure the effectiveness of EHS management
- Minimize deficiencies in practices and processes
- Reliably control Health, Safety and Environmental risks
- Ensure robustness of EHS Management system and procedures
- Confirm supply chain following international EHS and social standards

Solution

Valued Quality. Delivered.

EHS and social auditing is the accepted tool in the industry to fulfill these demands.

We help you:

- to develop and maintain an EHS and social audit system tailor made to your company's requirements
- to support your auditors during and after the assessment as co- or lead-auditors or we perform audits on your behalf as independent auditors

Procedure

Valued Quality. Delivered.

Audit System

Development of Audit system based on Company Guidelines (objective, frequency, what to assess etc.)

Pre-audit questionnaire

Audit checklists

Performance Metrics

Tracking of findings and recommendations

Corrective actions

Auditing

Audit Planning

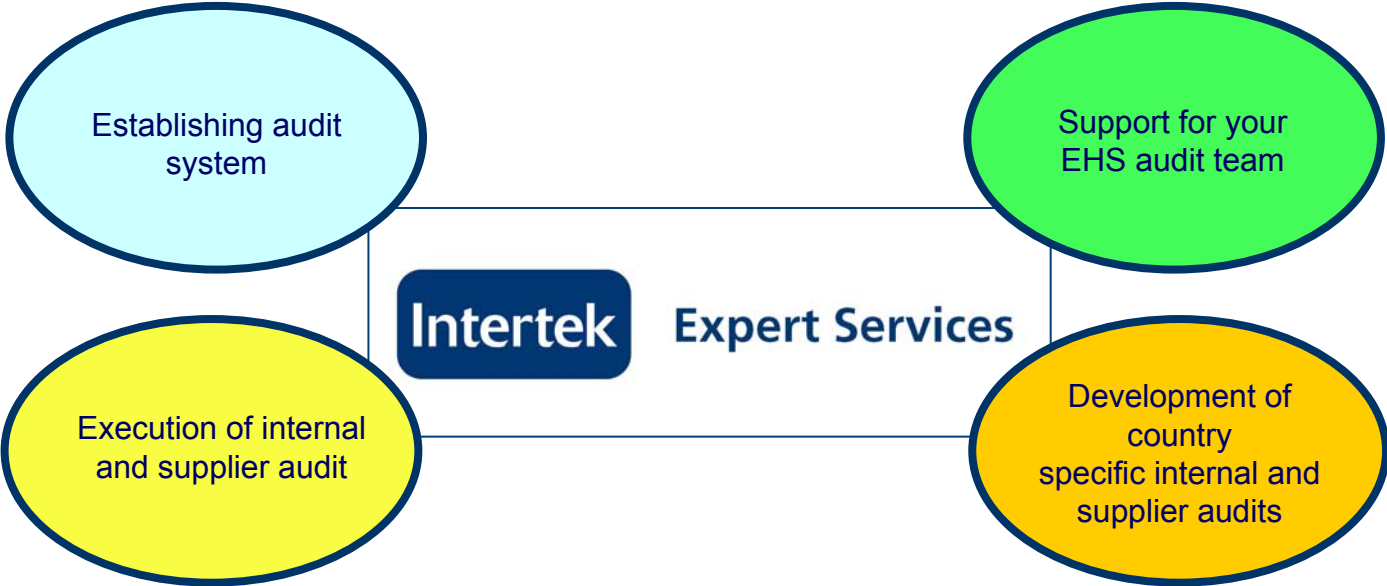

- Site selection
- Scheduling
- Audit preparation
- Define audit team
- Distribute pre-audit questionnaire
- Review of pre-audit questionnaire

Audit Execution

- On site assessment
- Present findings and recommendations
- Audit report
- Request for corrective actions

Post Audit Activities

- Tracking of corrective and preventive actions
- Follow-up reports from assessed site
- Grading according company guidelines

Benefits

Valued Quality. Delivered.

The Audit process helps organizations to enforce EHS procedures, like documentation and management of EHS requirements through corrective actions and closed loop follow-up processes. Auditing provides the necessary controls to support a company's ongoing monitoring process and reduce risk of safety and environmental hazard. With an EHS Audit system and a diligent implementation of corrective actions you can reduce the exposure of your company to investigations and liabilities.

- Our experience helps you saving resources
- Our international team will perform audits where your organization is not present, Auditors located in the targeted country (no language barrier)
- Independent auditors assess the EHS performance to your standards
- You do not need to maintain a full audit team yourself
- Auditors have background in the chemical industry
